

COUNTING SOLUTIONS FOR ALL APPLICATIONS
GOOD LOOKING AND EFFICIENT EQUIPMENT DOES NOT COST MORE,
IT EARNS MORE!

SUPERCOUNT

FOR THE MOST DEMANDING APPLICATIONS

SuperCount 12-2

- Fills two bottles at a time to improve accuracy and speed
- Accurate count eyes with chip detect feature
- Complete tear down with fewer contact parts eliminates cross contamination
- Effective dust extraction systems eliminate chips early in the process
- Validation documentation and 21 CFR 11 compliance packages are also available
- Robust mechanical design

SuperCount 18-3

- The most efficient counter capable of reaching up to 60 bottles per minute at 100 counts of tablets, soft gels, or size 0 to 00 capsules
- Fills 3 bottles at a time, 9 vibrators feed product fast
- Redesigned vibrator trays are lighter improving both quality and output speed
- Advanced multi-LED infrared analysis on the system detects broken and partial tablets allows scan speeds up to four times faster than contemporary counters in the industry
- Designed to be easy to clean and maintain
- Vision inspection system available to check product just before counting

SuperCount 24-4

- SuperCount 24 lane counters fill 4 bottles at a time to optimize counting speed
- 3 trays per 6 tracks per bottle improves the ability of the counter to separate products for accurate counting
- Pre-count gates and count eyes are cleaned in place reducing down time between batches
- All counters feature Windows-based touch screen controls
- Telescopic funnel assembly speeds changeovers between bottle sizes

VITACOUNT

OPTIMIZED FOR HIGH VOLUME PACKAGING

VitaCount 40 & 60

- Same count eyes, quality materials, and construction as the SuperCount line of counters for best-of-breed accuracy at the price of generics
- VitaCount 40 is designed for short runs & quick changeovers
- VitaCount 60 is for large counts and large products. High speed without high price.
- Advanced multi-LED infrared analysis on the system detects broken and partial tablets allows scan speeds up to four times faster than contemporary counters in the industry
- Two VitaCount 60 counters can be combined at installation or as a later upgrade to double output speeds

PHARMACOUNT 2-2

START BENCH MOUNTED - AUTOMATE LATER

PharmaCount 2-2

- Dismantles completely for cleaning in minutes
- Twin feeder bowls are made to handle all products without change parts
- Ideal for clinical trials and short runs
- Available bench mounted or with a height adjustable stand and container indexing system

VERICOUNT/VERICOUNT BATCH

COUNT VERIFICATION / SEMI-AUTOMATIC FILLER

- Ideal for count verification offline or next to any automated packaging line
- Available in “batch” configuration allowing small batches of tablets to be counted into bottles, accurately
- Accuracy achieved with high speed infrared counting technology
- Handles most shapes of tablets and capsules
- Twin layer of count sensors count and re-count each product for quality assurance

CONVEYOR SOLUTIONS

CUSTOM CONFIGURED TO SUIT YOUR ROOM LAYOUT

Our conveyor infeed and outfeed solutions are designed to suit your needs not ours:

- Detailed line layouts are engineered for optimum operation
- Conveyor sections can be added to update existing lines
- Include wire ways to hide electric and pneumatic lines
- Add centralized emergency stop buttons
- Integrate additional pieces of equipment with only minimal additional cost
- Create more space between equipment to boost line output

PHARMALIFT

PRODUCT ELEVATOR REDUCES OPERATOR WORKLOAD

Available customized to suit your feed requirements:

- Oversized hopper
- Additional height discharge is available to suit other counters
- Adjustable feed rate
- Single or dual discharge option
- Can be left or right handed

COMPLETE TABLET LINE

LET OUR 30 YEARS EXPERIENCE IMPROVE YOUR LINES

- We can integrate your equipment or new equipment
- We can recommend equipment or integrate preferred supplier equipment
- Speeds from 25-180 bottles per minute* can be accommodated
- We can accommodate limited space, or leave room for you to grow
- Regularly integrated equipment includes unscramblers, desiccant inserters, cappers, labelers, shrink bundlers & more
- Training start up and service contracts also available

*All speed and performance estimates are subject to testing of actual bottles and products.

COUNTER FOR BAGGERS

COUNTERS ARE NOT JUST FOR TABLETS & CAPSULES

- PharmaPackagingSystems counting technologies are applied to a wide range of applications
- Our counting systems are mounted over a wide range of baggers, cartoners and sachet/pouch machines
- Custom controls and multi-drop product chutes integrate with ease, and can match required feed rates
- A wide range of products, medical devices, electronics, etc. can be counted

INDUSTRIAL COUNTERS

COUNTERS REDUCE PRODUCT LOSS AS WITH MULTIHEAD SCALES

- Counters for soluble pouches, tablet pucks, fasteners, fittings and diamonds
- Available with gating system for buckets, or bulk cases
- Inline systems from 8-48 tracks according to output speeds required
- Recirculation and bulk product controlled feed systems
- High speed count sensors and PC based control software
- Standard and pharmaceutical grade solutions available

ASK US ABOUT OUR TABLET AND CAPSULE PACKAGING LINE SOLUTIONS

Notes:

When every ten bottles per minute equals one million bottles per shift per year more, why settle for less?

Detailed descriptions, specifications & dimensional drawings are available on request.
