

High Speed Vial Fillers:

Aseptic Filling Solutions: Complete pharmaceutical lines for vials, ampoules and syringes including washing, depyrogenization, plugging, stoppering, capping and labelling. Inline solution features 100% weight check with no loss of speed, RABs, and isolator as required. We are also experts in filling bottles with screw caps and dropper caps at high speed.

Counters:

Tablet and capsule counters, a complete range to suit all applications, from checking to small quick change and high speed solutions over 200 bottles per minute™. Each available on their own or as a line.

Sachet, Stick Pack and Pouch:

Single to multilane vertical solutions operate at up to 50 cycles or hundreds of packs per minute. Bulk, case pack or integrate lines with collation and cartoning. Pharma grade solutions with print options, easy open features, and 100% inspection of finished product.

Automated Supplement Packs:

Single or multilane feeder for supplement packs, up to 400 per minute with any combination of different products. Outfeed collation and cartoning also available.

Freeze Drying Systems:

For bulk or vial freeze drying. We make more freeze dryers than anyone else, we also make more loading and unloading systems, more RABs and isolator enclosures. Our highly efficient low cost manufacturing lets us pass on the savings to you. It's time to check us out.

Tube filling and more...

Tube filling, sealing and cartoning solutions for pharmaceutical, cosmetic and food products. Low speed or high speed, single or multi products or colors per tube.

Tablet Inspection System:

Advanced high power system can separate our product with smaller defects and finer differences in color even when the background color is similar. Individual faulty product ejection. Integrates with any counter. Buy from the experts.

AbleBlock LableBlock:

Feed, fill, plug, cap and label in a compact easy to use filler, up to 35 per minute, suitable for glass or plastic bottle, auto bottle feeder also available, fully networkable.

Rotary MonoBlock:

Traditional starwheel based rotary monoblock, 45 per minute with auto bottle feeder, piston or peristaltic pumps, screw caps, dropper caps, dropper tips, they are all possible.

Automatic Container Feeders:

We have several styles of bottle feeders including servo driven belt and hook unscrambler with cleaner, rotary disc feeder for unstable containers and for loading containers into starwheels or pucks, and introducing our brand new auto sorter with 100% inverted bottle cleaner for up to 50 tablet bottles per minute. Affordable.

Inline Monoblock for Large Fills:

More compact and more secure than an inline system, able to fill large fills with piston pumps and chuck type capping and over-capping when required. Simple to set up, dedicated tooling and reliable, high yield production.

Rotary Cappers:

Rotary cappers that are compact with easy to change tooling, and universal parts to suit a variety of caps. Eliminate cross threaded caps and insecure closures finally.

Tube and molded glass vials:

We offer you pharma quality glass containers at great prices direct from the factory. Standard and custom shapes available. Long term supply agreements shipped from stock on demand possible.
